ANNUAL REPORT

PAN AFRICAN CENTRE FOR CLIMATE POLICY

ACHIEVE FOR AFRICA A CLEANER AND SAFER ENVIRONMENT

Incorporated In Ghana: CG038532017 & Canada: 1017199-9

WWW.PACCPOLICY.ORG

MESSAGE FROM THE CEO

I am extremely honoured to give another introductory message on behalf of our entire working team, board of directors and advisory board.

2018 was a remarkable year for us as an organization, our partners and climate enthusiasts fighting with every tools and resources available to save our environment from the climate crisis.

With a team made up of volunteer working staff from three continents (Africa, North America and Europe), we have remotely worked together to accomplish yet another important milestone.

PACC Canada, our North America operations office in Canada, which was incorporated and registered as a non-for profit organization in March 2017 in the province of Ontario, has also seen some tremendous growth in it's activities and engagements.

The formation of PACC Consulting Group a project of PACC Policy climaxed our achievements for 2018. There was an urgent need to work with and support grassroots organizations, entrepreneurs and small business to advance their work by offering them technical support, management consultancy and project intelligence.

I want to end by thanking our entire volunteer working staff and advisory board for their continuous support and assistance.

I also want to thank our supporters for your contributions and encouragements.

Enjoy reading our 2018 annual report and please share your comments and suggestions - <mailto:INFO@PACCPOLICY.ORG>

Thank you!

ABOUT US

Vision

To Achieve for Africa a cleaner and safer environment.

Mission

Achieve for African countries a significant level of awareness on climate policies, and ensure that climate change mitigation, adaptation and resilience strategies are disseminated throughout Africa.

Increase the level of awareness on Climate Policies in line with the United Nations Framework Convention on Climate Change (UNFCCC) through trained climate change corps, educators and reporters.

Our Approach

We believe in working with community-based organizations, government and non-governmental organizations, private practitioners, environmental rights groups and individual planners to prioritize and plan for adaptive measures and interventions within an international framework. Our integrated approach lies on the premise that climate change affects all sectors (health, tourism and development, gender and culture, housing, agro ecological, town and country planning). Given that nearly two thirds of those earning less than \$1.25 a day in developing nations across Africa make a living from agriculture – an industry directly affected by climate change – rural communities will be one of our key focus for our social intervention initiatives.

Who are we

We are a team of self-motivated climate solutions enthusiasts from diverse professional background with a strong affinity to advocate, preserve and conserve the African environment through systematic thinking while working in line with national policies and international framework on climate change. [CLICK HERE](#) to our Staff List.

Focus Areas

- Dialogue with community as stakeholders to raise their awareness for collective participation and promote environmental sustainability
- Set up an independent taskforce to monitor a country's specific Paris Agreement initiatives through efforts of local partners and trained climate change activists
- Establish working relations and linkages with public and private institutions working on environmental and climate change projects
- Discuss regional policies on environment with focus on climate change mitigation and adaptation
- Organize public events and campaigns to raise awareness and public support on environmental sustainability and climate change
- Work with women groups to empower them on resilience and adaptation against climate change
- Raise awareness on renewable energy policies as they relate to climate change and environment
- Encourage innovation in solar energy through research
- Establish climate change volunteer youth campus corps chapters in schools across Africa.
- Work with state institutions (legislative arm of governments) on the stated and agreed objective of the UN Framework Convention on Climate Change (UNFCCC) to reduce greenhouse gas emissions to prevent dangerous levels of human interference with the climate system.
- Work with farmers to tackle climate change by educating them on environmentally friendly methods of farming.

Projects:

A REPORT ON THE 1ST AFRICAN ONLINE WASTE MANAGEMENT SOLUTIONS CONFERENCE

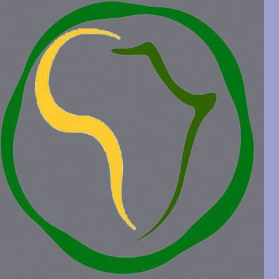

Ms Ewi Stephanie Lamma, a research fellow with the Pan African Centre For Climate Policy in Cameroon due to her expertise in the domain of Sustainable Natural Resource Management spoke on the theme of the conference: "Chronicling Waste Management Solutions in Africa; the Way Forward". The conference was held from February 7th to 9th 2018.

She gave a brief history of the Municipal solid waste trend within African cities and discussed the sources of waste, attempts to manage waste and challenges faced as a result taking her hometown Limbe, in the South West Region of Cameroon as a case study. She concluded with a call to diverse stakeholders to take part in this aspect of waste management in Africa. She encouraged the discovery of treasure hidden in waste and called on the government and donors to assist youths in making the best out of the waste already present within the continent. A REPORT ON THE RADIO TALK IN COMMEMORATION OF THE 33RD EDITION OF THE INTERNATIONAL WOMEN'S DAY CELEBRATIONS IN LIMBE, CAMEROON

The Pan African Center for Climate Policy (PACC Policy) and its collaborative partner in Cameroon, Forests Resources and People (FOREP) with support from the Ministry of Women's Empowerment and the Family, and Eternity Gospel Radio (96.5MHz), in Limbe Cameroon commemorated the 2018 International Women's Day.

They discussed the theme of the talk "Shaping Women's Role in Climate Change Adaptation and Mitigation", which was shaped from the theme for the International Women's Day Celebrations: "Intensify the Fight Against Discrimination on Women, Strengthen Partnership to Speed Up Sustainable Development ". CREATING FUNDING FOR GIRLS' EDUCATION THROUGH GREEN BONDS: A WIN-WIN FOR CLIMATE CHANGE MITIGATION AND REDUCED POPULATION GROWTH.

PACC Policy initiated a project titled "Creating Funding for Girls' Education Through Green Bonds: A Win-Win for Climate Change Mitigation and Reduced Population Growth". With the help of our main collaborator, Think Renewables Inc. in Canada, we managed to birth this project by developing a strong position paper to raise awareness on the relevance of funding girls' education. The research currently spans across 4 African countries namely Nigeria, Ghana, Gambia and Cameroon. Working together with our teams, we have been able to officially secure partnership with some organization including Forest, Resources and People (FOREP) in Cameroon, National Youth Service Corps (NYSC) in Cross River State, Nigeria and Street Children Empowerment Foundation in Ghana. PACC POLICY'S INSPIRE THE RURAL DWELLER VOLUNTEER PROGRAM

ADAM ERNST, Our First International Volunteer. Is a 33 years old and was born and raised in Toronto, Ontario, one of the biggest and heavily populated cities in Canada. Towards the end of June he flew to Ghana, to expose students of Wesleyan Academy in Anum a rural community approximately 3 hours drive not of Accra the capital city of Ghana to Educate the them on Global warming, Climate Change and its effect on the environment. They were exposed to ways to improve their lifestyle and practices to ensure they are more mindful of their environments at large

The goal of the after school program was fourfold:

- **To demonstrate the importance of applying our new knowledge and taking steps at improvement.**
- **To show young students that they have the power to create positive change.**
- **To designate a couple of the JHS2 female students as the project managers/supervisors in an attempt to empower them and expose the younger boys to following directions given by females.**
- **To create a job opportunity and income for the village that required no startup fees and/or overhead costs.**
