

2019

ANNUAL REPORT

PAN AFRICAN CENTRE FOR CLIMATE POLICY

ACHIEVE FOR AFRICA A CLEANER AND SAFER ENVIRONMENT

Incorporated In Ghana: CG038532017 & Canada: 1017199-9

WWW.PACCPOLICY.ORG

MESSAGE FROM THE CEO

It is always exciting to introduce to our global audience the input and effort of my entire team in protecting and saving the environment today for posterity sake.

The year 2019 could be termed as retreat for a higher strike for us as an organization, our partners and affiliated climate enthusiasts driving the climate action agenda.

With a team made up of volunteer working staff from three continents (Africa, North America and Europe), we have remotely worked together to accomplish yet another important milestone.

PACC Canada, our North America operations office in Canada, which was incorporated and registered as a non-for profit organization in March 2017 in the province of Ontario, has also seen some tremendous growth in it's activities and engagements this year.

The formation of the Climate Change Adaptation Project Developers (CCAPD) Forum to invite and train entrepreneurs and the private sector on climate projects development was a key climate action for PACC Policy in 2019. There was an urgent need to assist organizations and project developers in Africa especially Ghana to advance be part of the climate action agenda.

I want to end by thanking our entire volunteer working staff and advisory board for their continuous support and assistance. I also want to thank our supporters for their contributions and encouragements.

Enjoy reading our 2019 annual report and please share your comments and suggestions - <mailto:INFO@PACCPOLICY.ORG>

Thank you!

Signed

Kwame Anane Frempong *(Executive Director)*

About us

VISION

To Achieve for Africa a cleaner and safer environment.

MISSION

Achieve for African countries a significant level of awareness on climate policies, and ensure that climate change mitigation, adaptation and resilience strategies are disseminated throughout Africa.

Increase the level of awareness on Climate Policies in line with the United Nations Framework Convention on Climate Change (UNFCCC) through trained climate change corps, educators and reporters.

Our Approach

We believe in working with community-based organizations, government and non-governmental organizations, private practitioners, environmental rights groups and individual planners to prioritize and plan for adaptive measures and interventions within an international framework. Our integrated approach lies on the premise that climate change affects all sectors (health, tourism and development, gender and culture, housing, agro ecological, town and country planning).

Given that nearly two thirds of those earning less than \$1.25 a day in developing nations across Africa make a living from agriculture – an industry directly affected by climate change – rural communities will be one of our key focus for our social intervention initiatives.

Who we are

We are a team of self-motivated climate solutions enthusiasts from diverse professional background with a strong affinity to advocate, preserve and conserve the African environment through systematic thinking while working in line with national policies and international framework on climate change.

Focus Areas

- Dialogue with community as stakeholders to raise their awareness for collective participation and promote environmental sustainability
- Set up an independent taskforce to monitor a country's specific Paris Agreement initiatives through efforts of local partners and trained climate change activists
- Establish working relations and linkages with public and private institutions working on environmental and climate change projects
- Discuss regional policies on environment with focus on climate change mitigation and adaptation
- Organize public events and campaigns to raise awareness and public support on environmental sustainability and climate change
- Work with women groups to empower them on resilience and adaptation against climate change
- Raise awareness on renewable energy policies as they relate to climate change and environment
- Encourage innovation in solar energy through research
- Establish climate change volunteer youth campus corps chapters in schools across Africa.
- Work with state institutions (legislative arm of governments) on the stated and agreed objective of the UN Framework Convention on Climate Change (UNFCCC) to reduce greenhouse gas emissions to prevent dangerous levels of human interference with the climate system.
- Work with farmers to tackle climate change by educating them on environmentally friendly methods of farming.

Research Fellow—NDCs

Chima Obinka
Research Fellow – NDCs

Projects

PACC Policy Monthly Newsletters

The organization started its monthly publication of newsletters to update subscribers of our activities and opportunities in the field of climate change, environment, policies and renewable energy.

CCAPD Forum

Climate Change Adaptation Project Developers (CCAPD) Forum invite and train entrepreneurs and the private sector on climate projects development. Our objectives are:

- * Identify and encourage SMEs to venture into innovative climate solutions projects.
- * Provide assistance and support SMEs project developers to develop bankable projects that will attract funding sources
- * Connect SMEs project developers with the investor community

Entrepreneurship/empowerment

Implemented skill training project to increase the income generation of 15 women in the north of Etobicoke in collaboration with Rexdale Women's Centre and Somali Women and Children Support Network (SWCSN) funded by the City of Toronto's Tower and Neighborhood Revitalization Unit.

Restoration of Mangrove Degraded Sites (under review)

A proposal submission of the project has been made to the Nairobi Work Program. The main aim is to protect livelihood and ensure food security in the Limbe-Bimbia community in Cameroon through educational and awareness-raising activities and regenerate both degraded mangrove and non-mangrove sites with fruit trees.

Projects

PACC Canada Activities

PACC Canada seeks to engage Canadians to address the climate crisis through Campaigns, training, meetings and research. Major activity was Friday of Future.

FRIDAYOFFUTURE RALLY AT QUEENS PARK:

Our team lead participated in a climate change rally held at Queens Park, Toronto the seat of the Ontario Provincial government. The rally was organized by Friday for Future, a group dedicated to building a youth voice for solving our climate crisis. For more info go to: <http://www.paccpolicy.org/pacc-canada/campaigns/>

Conferences/Events

Africa Climate Week 2019

PACC Policy partnered Think Renewables Inc. in planning for the NDC Investment Forum which took place on the 18th of March 2019 on the topic "Innovative Climate Finance". The theme of the Africa Climate week was "Climate Action in Africa: A Race we Can Win". Meetings with Government of Ghana officials on the ThinkBiz Africa Project were held during and after the events.

Short Course On Renewable Energy

The Program Manager of PACC POLICY, Enoch Bessah was one of the 21 participants from 19 countries that participated in the four weeks international short course on Renewable Energy Sources and Energy Efficiency [SC76] in Dresden, Germany from 14th November – 7 December, 2018. The Centre for International Postgraduate Studies on Environmental Management (CIPSEM) at the Technical University of Dresden was the organizer. The course was funded by German Federal Ministry of the Environment, Nature Conservation and Nuclear Safety (BMU), and supported by UNEP and UNESCO. COP24 Climate and Health Side Event

The agenda of PACC Policy to explore health and climate change in 2018 led the Programs Manager, Enoch Bessah to Katowice, Poland on 8th December, 2018 as a participant during the Global Climate and Health Summit. This was a side event at COP24. The summit was organized by The Global Climate and Health Alliance in collaboration with World Health Organization (WHO), European Committee of the Regions and PRO SILESIA (University of Silesia, Poland).
